## Bio Engineering Statement

This letter is regarding inquiries on the National Bioengineered Food Disclosure Standard for the products you purchase from Harbar

The National Bioengineered Food Disclosure Law, passed by Congress in July of 2016, directed USDA to establish this national mandatory standard for disclosing foods that are or may be bioengineered.

The Standard defines bioengineered foods as those that contain detectable genetic material that has been modified through certain lab techniques and cannot be created through conventional breeding or found in nature.

The National Bioengineered Food Disclosure Standard (NBFDS) requires all parties in the chain of distribution to disclose information about whether food is bioengineered (BE) or uses bioengineered ingredients.

The following products, based on the National Bioengineered Food Disclosure Standard, are defined as:

<b>MFC#</b>	<b>Product Name</b>
